It should also be noted that most areas of the district had been taken over by National Water and Sewerage Cooperation (NWSC) Most sub-counties have relatively high safe water coverage with exception of Mafubira sub-county which has 26% safe water coverage. In the Financial Year 2017/2018 there was evidence that the LG Water department targeted this area with coverage below district average. From the 312,000,000/= for construction of Deep Boreholes in the district, Mafubira sub-county was allocated two (2) out of the planned twelve (12) boreholes to be drilled in the entire district. Under rehabilitation of old boreholes, the department planned to rehabilitate two (2) Deep bore holes in Mafubira out of the total 13 facilities planned in the district at a cost of 52,904,233/=.</p> <p>From the LG water department budget out of 416,116,233/= only 142,139,113/= was channeled to low coverage sub-counties representing 34% of the total budget allocation.</p>	0

The Water department again constructed a flash toilet facility in Namulesa Rural Growth Centre in Mafubira sub-county at a cost of 37,212,000/=. However, well as there was effort to target this sub-county with safe water below district average, the failure by the department to construct a single borehole out of the implemented ten (10) in the entire district at a cost of 240,000,000/= exposed failure to follow guidelines.
